

Lumesis, Inc. February 2017 DIVER Geo Scores Released

Proprietary Score Shines Spotlight on Employment and Housing

STAMFORD, CT – March 6, 2016

Lumesis, Inc. DIVER Geo Score results for February 2017 have been released. The DIVER Geo Score is a relative score of the economic health of a U.S. state, county or city. Based on a scale of 0-10, with 10 being the best, the Geo Score is calculated from multiple economic and demographic factors related to employment, income and housing and is updated monthly. The Geo Score helps market participants understand the economic health of every State, county and over 350 cities in a simple score.

"The good news is that the majority of States have seen an increase in housing prices, with only four showing any deterioration since the fourth quarter of 2015. The concern, dare we say, is the beginning of a housing bubble." said Gregg Bienstock, CEO and Co-Founder at Lumesis, Inc.
